Software Release Notes

Christie Link version 1.1.0

This document describes the changes from Christie Link version 1.0.1 to version 1.1.0.

Affected products

The following products are affected.

Christie Link

Purpose of release

The primary purpose of this release is to introduce the following features and fixes:

- Add support for HDR10.
- Improve DisplayPort and HDMI support, including HDCP auto-detection.
- Improve system responsiveness.

Change details

The following changes have been implemented in this release.

User interface

The following update has been made:

- Removed the option to select HDCP mode.

Video processing

The following enhancement has been made:

- When using an HDMI input, HDCP modes 1.4 and 2.2 are automatically detected.

Known issues

This release of Christie Link contains the following known issues:

- This release of Christie Link software is optimized for Boxer software version 1.5.0 or newer. Ensure the Boxer projector is updated to the latest release of software.

- When using Two Port mode (for example, to achieve 4K120 Hz using two DisplayPort inputs), Christie recommends configuring the source first and then switching to Two Port mode on Christie Link.
- In rare cases, Christie Link HDMI inputs do not decode colors correctly.
  Resolution: Remove and reinsert the HDMI input.
