

## Dongle update

To update your dongle to Version 8, please follow the process described below:

Download, unzip and run the [PandorasBoxDongleReadout.zip](#) to gain the information of a connected dongle.

- Select the left-hand tab "Collect Key Status Information" within the readout tool
- Press the "Collect Information"-button at the bottom. This command will initiate a file-dialogue that allows you to save your dongle information as a .c2v-file.

Once you have done this, send this file to [update.pandorasbox@christiedigital.com](mailto:update.pandorasbox@christiedigital.com) in order to upgrade to Version 8.

You will receive a .v2c-file in return with the updated information.

- Open the readout tool again and select the right-hand tab "Apply License Update" this time.
- Press the "... " button to choose the dongle-file (\*.v2c) you received.

Click "Apply Update" on the bottom left to upgrade your dongle.

Once you have succeeded in doing this, you are ready to run and explore Pandoras Box Version 8.

Contact our technical support center or your Christie Sales Manager if you require more information or assistance.
