

END-OF- PRODUCTION

Extreme Series LCD video walls

On August 7, 2024 all Christie® Extreme Series models (listed below) will reach end-of-production.

As part of our continuous efforts to innovate and enhance our product offerings, we have made the strategic decision to discontinue our Extreme Series. This change allows us to focus our resources and development efforts on our advanced LED video walls, where we see significant potential for growth and improvement.

Our current LED models, including the Core Series III and MicroTiles® LED, represent the future of visual display technology. These products offer superior performance, flexibility, and reliability, which better meets the needs of our customers and provides a more robust solution for various applications.

We understand that this change may affect your current and future plans. To ensure a smooth transition, we'll continue to support existing LCD video wall installations with service and parts for up to three years, while parts are available, unless the product is covered under a warranty or extended warranty, in which case we'll continue to provide support for the applicable warranty period. Please contact your Christie territory sales manager if you have any questions or concerns during this transition.
