

# Software Release Notes

## Inspire Series version 1.2.0

This document describes the changes from Inspire Series version 1.1.0 to version 1.2.0.

### Affected products

The following products are affected:

- 4K860-iS
- 4k860A-iS

### Purpose of release

The primary purpose of this software release is to fix the following issues:

- When the DynamicBlack feature was enabled, the image became bright causing a lot detail to disappear and a color shift.
- Reduced the high frequency noise from the wheel motor.
- ACU Target was not obvious when selected.
- When performing an Auto focus calibration, the reset function (**Reset Image Settings > Reset Configuration**) was not uniformly grayed out.
- After doing the lens calibration, the saved location could not be executed.
- The backup restore of the saved memory was cleared due to the execution of OPFU.
- After connecting the player to play a 3D video and powering on, it displayed 2D and then switched to 3D.
- In Picture-by-picture (PBP) mode, the Size Preset must be set to Full Size.
- After triggering the Backup Input function, changing the Color Space setting had no effect.
- Performing a factory reset sometimes caused a crash.
