CHRISTIE®

Software Release Notes

Twist 2.4.2

This document describes the new features, known issues, and fixed issues for Christie Twist.

New features

The following are new features and enhancements included in this release.

- Preliminary support for Crimson projectors.
- Dedicated Mapper Mask layer supporting the Masked Mappers feature in Mystique Install 1.2.3 and later.

Known issues

The following are known issues in this release.

- When interacting with a Boxer, the Projector Control dialog does not automatically display the current input selection. All other Projector Control options remain functional including selecting an input from list of available options.
- On systems with Dell Backup And Recovery installed, the Twist file open or save dialogs may not function properly or may cause Twist to crash. The workaround for this issue is to uninstall Dell Backup And Recovery.

Change log

The following are features released in previous versions of Christie Mystique Install that are not affected by this release.

- Projector License Utility now supports license keys containing additional features for M-series, J-Series, StIM WU, StIM WQ, D4K projectors.
